

2016 Supplemental Summary

Statewide Regional Evacuation Study

MARTIN COUNTY APPENDIX

This document contains summaries (updated in 2016) of the following chapters of the 2010 Volume One, Technical Data Report:

Chapter 1: Regional Demographics

Chapter 2: Regional Hazards Analysis

Chapter 4: Regional Vulnerability & Population Analysis

Funding provided by the Florida Division
of Emergency Management

Work completed by the
Treasure Coast Regional Planning Council

STATEWIDE REGIONAL EVACUATION STUDY – TREASURE COAST
MARTIN COUNTY APPENDIX

This page intentionally left blank.

A. Introduction

This appendix provides a County Demographic Profile, Vulnerability Profile and a more detailed vulnerability analysis of critical facilities and corresponding maps.

B. County Small Area Data

Small Area Data is used with the Regional Transportation Evacuation Model. The data is gathered for three time periods – 2010, 2015, and 2020. This data is centered on housing units and provides for the number of site built and mobile homes in each County. The maps below depict the density of both site built homes in Martin County and mobile homes in the County.

Table 1: Martin County Small Area Data

	2010	2015	2020
Total Dwelling Unit Site-Built Homes	69,637	70,555	74,868
Occupied Site-Built Homes	60,855	58,497	62,078
Population in Site-Built Homes	146,820	133,773	142,076
Vehicles in Site-Built Homes	103,454	89,724	95,387
Total Dwelling Unit Mobile Homes	8,553	7,477	7,481
Occupied Mobile Homes	7,009	5,658	5,667
Population in Mobile Homes	12,879	12,166	12,226
Vehicles in Mobile Homes	8,760	9,222	9,130
Population in Hotel-Motel Units	1,514	2,119	2,164
Vehicles in Hotel-Motel Units	1,057	1,476	1,508

Map B1: Martin County Site Built Home Density

Map B2: Martin County Mobile Home Density

C. County Demographic Trends

This section of the report, and the data contained herein, is provided to capture a profile of the county including population **trends** not previously discussed in the regional demographics overview. The County Profiles are compiled by Florida Department of Transportation and can be found online at <https://etdmpub.flh-dot.org/est/>

STATEWIDE REGIONAL EVACUATION STUDY – TREASURE COAST
MARTIN COUNTY APPENDIX

Age Trends

Description	1990	2000	2010	2014(ACS)
Under Age 5	5.12%	4.30%	4.31%	4.17%
Ages 5-17	12.48%	14.25%	13.85%	13.03%
Ages 18-21	3.74%	3.18%	4.08%	3.48%
Ages 22-29	9.53%	8.01%	6.51%	7.47%
Ages 30-39	13.72%	11.71%	9.25%	9.23%
Ages 40-49	11.28%	13.07%	13.73%	11.81%
Ages 50-64	16.71%	18.35%	21.87%	22.48%
Age 65 and Over	27.44%	28.25%	28.79%	28.33%
-Ages 65-74	16.68%	14.24%	12.93%	13.91%
-Ages 75-84	8.83%	10.98%	10.14%	9.92%
-Age 85 and Over	1.93%	3.03%	3.72%	4.40%
Median Age	NA	47	49	50

Income Trends

Description	1990	2000	2010	2014(ACS)
Median Household Income	\$31,780	\$43,083	\$53,210	\$51,703
Median Family Income	\$37,732	\$53,244	\$70,271	\$60,860
Population below Poverty Level	8.32%	8.77%	10.40%	12.05%
Households below Poverty Level	7.85%	7.57%	8.90%	10.28%
Households with Public Assistance Income	3.94%	1.30%	0.80%	1.42%

Disability Trends

See the Data Sources section below for an explanation about the differences in disability data among the various years.

Description	1990	2000	2010	2014(ACS)
Population 16 To 64 Years with a disability	4,183 (5.06%)	13,501 (11.38%)	NA (NA)	NA (NA)
Population 20 To 64 Years with a disability	NA (NA)	NA (NA)	NA (NA)	7,732 (10.05%)

Location Maps

D. Martin County Census Maps

The following maps depict a graphical representation of the key demographics that effect an evacuation in a County. They include:

Map D1: Population Density

Map D2: Over 65 Population Density

Map D3: Vehicle Density

Map D4: Poverty Status

Map D5: Limited or No English Speaking Population

Map D1: County Population

Map D2: Elderly Population (65+)

Map D3: County Vehicle Density

Map D4: Poverty Status

Map D5: English Language Not Spoken at Home

E. Martin County Hazard Maps

The Regional Evacuation Study includes not only an analysis of Storm Surge, but FEMA defined Flood Zones as well as the Wildfire Risk in each County.

Storm Surge

Storm surge is the abnormal rise in water level caused by the wind and pressure forces of a hurricane or tropical storm. Storm surge produces most of the flood damage and drowning associated with storms that make landfall or that closely approach the coastline. Of the hurricane hazards, the storm surge is considered the most dangerous as nine out of ten hurricane-related deaths are caused by drowning. The County storm surge zones and evacuation zones can be found in the maps below.

Map E1: Martin County Storm Surge Zones

Map E2: Martin County Evacuation Zones

Freshwater Flooding and the Inundation of Evacuation Routes

Inland Riverine and freshwater flooding often becomes a significant factor as a result of tropical storms and hurricanes. Unlike storm surge, the rainfall associated with, and in advance of, a hurricane does not necessitate the emergency evacuation of residents during the passage of a hurricane. Following a storm, however, the coastal flooding and rainfall – particularly from slow moving storms - necessitates an evacuation of flooded inland resident's days after, as swollen rivers and streams breach their banks or levees.

Regarding hurricane evacuation, however, rainfall may cause the early inundation of roadways sought as evacuation routes by vehicles attempting to escape from areas vulnerable to the approaching storm surge. In addition, given Florida climatology and the normal summer weather, flooding may occur as a disassociated event prior to the hurricane, flooding evacuation routes, and saturating the ground. FEMA defined Flood Zones are presented below.

Map E3: Martin County Flood Zones

Rainwater inundation of evacuation routes must be addressed in an evacuation plan. The planning strategy to address this problem is to plan for the passage of all vehicles over such roadways before substantial rainfall from the hurricane was expected to arrive. Hourly records of rainfall rates and accumulation for past hurricanes indicate that rates high enough to surpass drainage capabilities normally parallel in time the arrival of sustained tropical storm-force winds. Utilizing this as an assumption of the timing of freshwater roadway inundation, the pre-landfall hazards time quantification for sustained tropical storm-force winds will also compensate for early rainfall inundation of evacuation routes.

Those roadways known historically to be vulnerable from freshwater flooding have been identified by the county and municipal emergency management/law enforcement/ emergency response personnel. These routes, including those which were inundated or forced to close during recent flooding events or are within a 100 Year Flood Plain as identified by FEMA, are presented in a map below.

Map E4: Martin County Flooded Roadways

Wildfire

In the last decade, there have been on average 3,361 wildfires a year throughout the State of Florida (Florida Forest Service, 2011). Although fire is a naturally occurring element in Florida ecosystems, the continued development of housing and infrastructure within wildland areas and forests presents a wildfire hazard that will continue to escalate as residential development continues to encroach on natural areas.

Map E5: Martin County Wildfire Risk

F. Critical Facilities Analysis

Since the release of the original Regional Evacuation Study Program as part of the statewide update in 2010, the Florida Division of Emergency Management (FDEM) has maintained a critical facilities database for the entire State. FDEM coordinates the update and maintenance of this data.

The Critical Facility Inventory (Data base) includes a comprehensive list of critical facilities identified by the State and County Emergency Management Agencies. This inventory is not published as part of the report. However, selected facilities which may require evacuation or mitigation are identified in the tables and maps which follow. The tables indicate vulnerability from storm surge (based on the SLOSH model), location in an Evacuation Zone, freshwater flooding (based on the FEMA Flood Maps) and wildfire (Wildfire Interface/Levels of Concern).
